Military Status: Exempted

SUMMARY

Backend Software Engineer with hands-on experience in **.NET (C#, ASP.NET Core)**, Clean Architecture, and REST API development, backed by an AI/ML background from real computer-vision project work. Currently expanding into **fullstack development** with React and Next.js. Focused on writing maintainable, well-architected systems — a habit reinforced by regularly teaching others to code.

TECHNICAL SKILLS

Languages & Runtime: C#, TypeScript/JavaScript, Python, CPP, JAVA.

Backend: ASP.NET Core (MVC, Web API), Entity Framework Core, LINQ, RESTful API Design, JWT Authentication & Authorization, Clean Architecture, Repository & Unit of Work Patterns, AutoMapper, Swagger/OpenAPI. Secondary: Node.js, Express.js, NestJS.

Frontend (In Progress): React.js, Next.js, Tailwind CSS.

Databases: SQL Server, MySQL, MongoDB — schema design, query optimization, relational modeling.

Engineering Practices: OOP, SOLID, Design Patterns, Git/Git-Flow, Docker, CI/CD.

WORK EXPERIENCE

Netpoint Software Solutions

Cairo, Egypt

Technical Instructor / Backend Mentor

Jun 2026 – Present

- Designed and delivered a **25 hours .NET backend internship program** for fresh graduates, taking participants from curriculum fundamentals through independent capstone project delivery.
- Contributed to backend software solutions alongside training work, keeping curriculum grounded in practices actually used in production.

GenzApp — Authentication Module (Freelance)

Remote · genzapp.com

Freelance Backend Developer

- Engaged by a client to build the **authentication module** (scope limited to auth, not the full product) for their NestJS/Next.js wellness platform — OAuth sign-in and JWT session handling, delivered as a self-contained, integrable unit.

Digital Egypt Pioneers Initiative (DEPI)

Cairo, Egypt

Technical Mentor — Backend Track (.NET)

May 2024 – Dec 2024

- Mentored student cohorts in .NET backend development (Clean Architecture, REST API design), running code reviews that improved their code quality.

Code School

Remote / Cairo, Egypt

Part-Time Coding Instructor

Sep 2025 – Present

- Deliver programming fundamentals and project-based learning sessions for school-age students, focusing on logical thinking and algorithmic problem-solving.

iSchool

Remote / Cairo, Egypt

Part-Time Coding Instructor

Jun 2025 – Oct 2025

- Led online and onsite coding sessions for beginner and intermediate students across multiple age groups.

Mo5am El Freelance (Freelance Initiative)

Port Said, Egypt · Sessions Snapshots

Lead Instructor

Jan 2025 – Jul 2025

- Organized and led a 7-month program training young learners in programming and freelancing workflows.

PROJECTS

Wasla — Real-Time Sign Language & Emotion Recognition (Graduation Project)

GitHub Repository

Python · MediaPipe · TensorFlow/Keras · DeepFace · FastAPI · WebSocket

- Designed a multi-threaded real-time inference pipeline (capture → landmark extraction → classification) using bounded, drop-oldest queues to decouple camera latency from model inference.
- Built a stable `predict_frame()` API contract so a separate team could integrate the model without coordinating on breaking changes, served over a FastAPI + WebSocket service with latency metrics.
- Evaluated 3 model architectures and applied 5 augmentation strategies with a video-level split to prevent data leakage.

FixMate — Vehicle Service Booking System

GitHub Repository

ASP.NET Core 8.0 · EF Core · Clean Architecture · Docker · JWT · Swagger

- Designed with **Clean Architecture** (decoupled Domain, Application, Infrastructure, Presentation layers); implemented registration and booking workflows behind **JWT auth**, containerized with **Docker** and documented via **Swagger/OpenAPI**.

EDUCATION

Helwan University

B.S. in Computer Science, Artificial Intelligence

Helwan, Egypt

Sep 2022 – Jun 2026

CERTIFICATIONS

- DEPI .NET Web Development
